Summary

Passionate Full-Stack JavaScript Developer with expertise in the MERN stack. Skilled in front-end development and API integration and development. Experienced in working with startups and open-source projects. Looking for opportunities to leverage my skills in modern web technologies to build scalable applications.

Skills

- Front-end: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Material UI
- Back-end: Node.js, Express.js, MongoDB, REST API, JWT Authentication
- Version Control: Git, GitHub
- Tools: VS Code, Figma, Postman, Nodemailer
- Other: Web performance optimization, Responsive design

Experience

1. Front-End Developer | Startup Company

- Leading the front-end development team and managing project structures.
- Collaborating on GitHub with other developers to maintain code quality.
- Implementing interactive UI components for a Learning Management System (LMS) project.

2. Freelance Web Developer | Upwork and Fiverr (Self-employed)

- Specialized in Figma to React HTML conversions and responsive web design.
- Applied for projects daily and optimized proposals for client engagement.
- Learning client management and improving bidding strategies on Upwork.

3. Intern Web Developer | Japanese Company (Previous Experience)

- Assisted in developing and maintaining company websites.
- Received positive feedback from the owner but left due to low salary.

Projects

1. LMS Web Application (Course Project)

- Built a full-stack LMS platform with user authentication and email verification using Nodemailer.
- Implemented dynamic dashboards for students and instructors.

2. Authentic Quran and Hadith for Ummah (Accepted Project Proposal)

- Developing a web platform for easy access to Islamic resources.
- Responsible for front-end development and API integration.

Education

- Postgraduate Diploma in Web Development (MERN Stack) (Ongoing, 3-4 months left)
- Bachelor's in English Language (Completed)

Languages

- English: Fluent
- Bangla: Native
